

# VINSAK LFD Series

*Flatbed Die Cutter, Hot foil, Hologram stamping, and Slitting system*

## BENEFITS

- *Low setup cost.*
- *Prompt support worldwide.*
- *Exceptional return on investment.*
- *High-speed and quality label production.*
- *High precision, web path controlled by servo motor.*
- *Photoelectric eyes guides in die cutting and hot stamping process, Special sensors for registered hologram stamping are optional.*
- *The machine can do film laminating, hot stamping, die cutting, punching, and waste-off (or slitting) at one time. It is an auxiliary offline equipment for the flexo press, web screen press, and intermittent rotary press.*

# FEATURES

- *Electric Control System: The main control unit adopts electric components, which ensures accurate feeding and easy operation. Two lateral registration sensors and one longitudinal registration sensor ensures high die-cutting accuracy.*
- *The machine uses automatically cycling oil-supply system to ensure stable pressure and service life of the machine.*

Model	Max Die- cutting Size (width* length)	Max Die-cutting Speed	Unwinding/ Rewinding Dia	Overall Dimension	Machine weight
